

UROLIFT®

BPH Relief. In Sight.™

The UroLift System is a minimally invasive procedure used to treat BPH. It is the only leading enlarged prostate treatment that does not require heating, cutting or removal of prostate tissue.¹⁻⁶

UroLift
Delivery Device

Indications for use:

The UroLift System is indicated for the treatment of symptoms due to urinary outflow obstruction secondary to BPH in men 50 years or older.

Contraindications:

The UroLift System should not be used if the patient has:

- Prostate volume is > 100cc
- A urinary tract infection

The benefits of the UroLift System for patients are:

- Patients are generally discharged post-op without a catheter^{1,7}
- Rapid improvement in symptoms and quick recovery^{1,7}
- The only leading BPH procedure shown to not cause new and lasting sexual dysfunction^{*2,4,9}
- May be suitable for patients who do not want to undergo major surgery due to risks of complications and side effects^{11,14}
- Better symptom relief than medications^{1,2}
- Lower risk profile than TURP¹⁴
- Rapid relief and recovery^{1,7}

The benefits of the UroLift System for the health care system are:

- Can be performed as a daycase or an outpatient procedure⁷
- Can be performed under local anaesthesia⁷
- Helps to reduce waiting lists and release theatre capacity¹⁵
- Patients are generally discharged from the hospital or the outpatient clinic within a couple of hours post procedure¹⁵
